DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1, 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Reed (U.S. Patent No. 2,815,895).

Reed teaches a nozzle for dispensing comprising a hollow nozzle body having a base, a tip and having a flow passage formed therethrough for receiving the material (see Fig. 4, 6 and 8). The nozzle tip includes a first side and a second side opposite the first side and the tip comprises a generally triangular shaped aperture (see Fig. 6 and 8) that is configured to be dispense a greater amount of the material proximate the first side than an amount of the adhesive dispensed proximate the second side. The nozzle tip, a generally triangular shaped aperture, comprises a pair of opposite edges extending from a first side of the tip portion to a second side of the tip portion, wherein a first distance between the pair of edges at the first side is smaller than a second distance between the pair of edges at the second side, wherein the outlet aperture dispenses a greater amount of the adhesive proximate the second side as compared to an amount of adhesive dispensed at the first side.

Allowable Subject Matter

2. Claims 6-14, and 16-22 are allowed.
3. Claims 2-3, and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

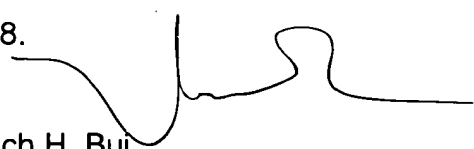

4. In view of the amendment filed on December 22, 2003, PROSECUTION IS HEREBY REOPENED.
